

=====

COMPUTATIONAL NEUROSCIENCE SUMMER RESEARCH INTERNSHIPS
FOR UNDERGRADUATES IN THE UNITED STATES

=====

Compiled: 1 September 2026

Target cycle: Summer 2027 (most applications open Oct-Dec 2026, close Jan-Mar 2027)

HOW TO READ THIS LIST

- [2027 CONFIRMED] = dates/deadlines already posted for the Summer 2027 cycle.
- [2026 CYCLE] = the most recent published details. Programs are very consistent year to year, so treat these as a planning estimate and re-check the page once the 2027 posting goes live (usually October or November 2026).
- [STATUS UNCERTAIN] = the program paused, lost funding, or has not posted recently. Worth an email before you invest time in an application.
- Nearly all NSF- and NIH-funded programs require U.S. citizenship or permanent residency. Institute-run and privately funded programs often do not.

=====

SECTION 1 - DEDICATED COMPUTATIONAL / THEORETICAL NEUROSCIENCE PROGRAMS

These are the ones actually built for modeling, theory, and data analysis rather than wet-lab work with a computational add-on. Apply to all of them.

=====

1. uPNC - Undergraduate Program in Neural Computation

Host: Center for the Neural Basis of Cognition, Carnegie Mellon University +
University of Pittsburgh, Pittsburgh PA

Focus: Computational and theoretical neuroscience. The single most
recognizable comp-neuro REU in the country.

Length: 10 weeks, residential

Support: Stipend, dormitory housing, travel to/from Pittsburgh

Eligibility: U.S. citizen or permanent resident; sophomore or junior at time
of application; 4-year accredited institution; 18+ at start;
strong quantitative background preferred; aimed at future PhDs

Dates: 26 May - 31 July 2026 [2026 CYCLE]

Deadline: 15 February 2026 [2026 CYCLE]

Apply:

<https://www.cmu.edu/ni/academics/undergrad/summer-research-program-neural-computation>

Contact: upnc-summer@andrew.cmu.edu

Note: Application is a Google Form plus an email packet (statement, CV,
transcript, two letters). Start asking for letters in December.

2. Carney Summer Scholars in Computational Neuroscience

Host: Robert J. and Nancy D. Carney Institute for Brain Science,
Brown University, Providence RI

Focus: Explicitly computational brain science - modeling, neural data
analysis, computational psychiatry-adjacent projects

Length: 9 weeks

Support: Stipend, travel, housing

Eligibility: U.S. citizen, national, or permanent resident; enrolled full

time at a U.S. institution; GPA 3.0+; committed to PhD or MD-PhD; at least 2 semesters completed and 1 remaining.
Only 7 slots for non-Brown students.

Deadline: 3 February 2026 [2026 CYCLE]

Apply: via the Leadership Alliance portal at
<https://app.theleadershipalliance.org/> - select Brown as first choice
and "Computational Neuroscience" as Area of Interest

Info:

<https://carney.brown.edu/education-training/undergraduate/carney-summer-scholars>

Contact: kristin_webster@brown.edu

Note: Funded by NINDS R25NS130655. Applying through Leadership Alliance means one application can also reach other member institutions.

3. NSF Neuro-REU (Computational Neuroscience)

Host: University of Missouri, Columbia MO

Focus: Computational neuroscience across four colleges; opens with a one-week computational neuroscience boot camp for students who have not modeled before

Length: 10 weeks

Support: \$6,000 stipend plus travel, tuition, on-campus housing, meal plan

Eligibility: U.S. citizen or permanent resident; two years of college completed by June; majors in biology, psychology, engineering, physics, math, or related; not graduating before July;
Mizzou students not eligible

Deadline: mid-March [2026 CYCLE]

Apply: <https://nairs.mufaculty.umsystem.edu/research/nsf-neural-reu-project>

Note: The boot camp makes this a strong first computational experience if your background is more biology than math.

4. Summer Research Interns, Center for Computational Neuroscience (CCN)

Host: Flatiron Institute, Simons Foundation, New York NY

Focus: Pure computational and theoretical neuroscience alongside full-time research scientists. Neural data analysis, statistical neuroscience, normative and mechanistic modeling, scientific software.

Length: approximately 11 weeks, in person in Manhattan

Support: Paid internship; housing support near the foundation offices

Eligibility: Undergraduate, graduate, and pre-doctoral applicants. Fewer citizenship restrictions than NSF/NIH programs - worth checking the individual posting.

Timing: Applications open 1 December [2026 CYCLE pattern]

Apply: <https://apply.interfolio.com/52828/positions>

Info: <https://www.simonsfoundation.org/summer-at-simons/>

Note: There is also a separate NeuroRSE "Neuroscience Software Summer Internship" at Flatiron for students who want research-software engineering rather than a science project:

<https://neurorse.flatironinstitute.org/>

Note: Sister centers (Computational Biology, Mathematics, Quantum Physics, Polymathic AI) run parallel internships from the same portal.

5. Undergraduate Research Program (URP) - Bioinformatics & Computational

Neuroscience track

Host: Cold Spring Harbor Laboratory, Cold Spring Harbor NY

Focus: CSHL is one of the strongest comp-neuro environments in the U.S. (Zador, Koulakov, and the NeuroAI group). Programming workshops and a lecture series on neural networks run alongside the research.

Length: ~9 weeks

Support: \$7,000 stipend, room and board fully covered (cabin housing)

Eligibility: Current sophomores and juniors. International students eligible if enrolled full time at a U.S. institution on a student visa, or via a pre-existing agreement with their foreign university.

Dates: 7 June - 7 August 2027 [2027 CONFIRMED]

Deadline: 15 January, 11:59pm PST [2027 CONFIRMED]

Apply: <https://www.cshl.edu/education/undergraduate-research-program/>

Note: ~20 students per year. Highly competitive; a specific, named interest in one or two labs helps a great deal.

6. SYNAPSE Internship Program (SIP)

Host: Princeton Neuroscience Institute, Princeton NJ

Focus: Full range of PNI research including a deep bench of theoretical and computational labs; coding courses in R and Python for all summer researchers

Length: 9 weeks

Support: Stipend (typically NSF REU rate, roughly \$700/week), on-campus housing, meal plan, travel

Eligibility: Non-Princeton undergraduates; U.S. citizens or permanent residents (NSF requirement); rising 2nd, 3rd, or 4th years

Dates: 31 May - 30 July 2027 [2027 CONFIRMED]

Application window: 1 November 2026 - 1 February 2027 [2027 CONFIRMED]

Offers: end of February / early March 2027

Apply: through Leadership Alliance (<https://app.theleadershipalliance.org/>) or NSF ETAP (<https://etap.nsf.gov>)

Info:

<https://pni.princeton.edu/apply/undergraduate-summer-research-programs/application-process>

7. BSG-MSRP-Bio (Brain and Cognitive Sciences track)

Host: MIT Department of Brain and Cognitive Sciences + Center for Brains, Minds and Machines, Cambridge MA

Focus: All fields of neuroscience with genuine access to computational neuroscience, AI, and cognitive science labs

Length: 10 weeks

Support: Weekly stipend, campus housing, domestic travel reimbursement

Eligibility: Sophomores, juniors, or non-graduating seniors; 3.5+ GPA in science courses; prior research experience required; MIT undergrads and most international students not eligible. Preferred backgrounds: math, physics, CS, EE, neuroscience, psychology, cognitive science. Python/MATLAB/C++ preferred.

Dates: 1 June - 8 August 2026 [2026 CYCLE]

Deadline: 30 January [2026 CYCLE]

Apply: <https://bcs.mit.edu/msrp>

Note: Three letters required, at least one from a research supervisor.

=====

SECTION 2 - NEUROAI, MACHINE LEARNING, AND BRAIN-INSPIRED COMPUTING

=====

9. Kempner Institute Undergraduate Summer Internship in AI/ML Research & Engineering

Host: Kempner Institute for the Study of Natural and Artificial Intelligence, Harvard University, Cambridge MA

Focus: The Kempner sits exactly at the neuroscience/AI boundary. Past project areas include computational neuroscience, dendritic modeling, brain-inspired systems, and multimodal models.

Length: 10 weeks (15 June - 21 August 2026) [2026 CYCLE]

Support: Paid. No housing provided - you arrange your own, which matters in Cambridge. Budget for this.

Eligibility: Currently enrolled full-time undergraduate, or bachelor's completed within the past year. Must be authorized to work in the U.S.; no visa sponsorship. Python and PyTorch proficiency required.

Deadline: applications reviewed in cohorts; first cohort ~30 March [2026 CYCLE]

Apply:

<https://kempnerinstitute.harvard.edu/kempner-institute-undergraduate-summer-internship-program-in-ml-research-engineering/>

Note: Because a recent graduate is eligible, this is one of the few good options for a graduating senior.

11. Center for Brains, Minds and Machines (CBMM) Summer Internships

Host: MIT / Harvard consortium, Cambridge MA

Focus: Intelligence at the intersection of neuroscience, cognitive science, and machine learning

Info:

<https://cbmm.mit.edu/diversity/undergraduate-summer-research-internships-neuroscience>

Note: Placement largely runs through MSRP-Bio (entry 7). Also check the CBMM summer course listings.

12. Caltech SURF and WAVE Fellows

Host: California Institute of Technology, Pasadena CA

Focus: Any Caltech lab, including the Computation and Neural Systems (CNS) option - Caltech's CNS faculty are a major comp-neuro cluster

Length: 10 weeks

Support: Stipend; WAVE Fellows adds housing and travel support

Eligibility: SURF is open to Caltech and non-Caltech students; WAVE Fellows targets students from institutions with fewer research opportunities

Deadline: typically mid-January to mid-February [VERIFY]

Apply: <https://sfp.caltech.edu/undergraduate-research/programs>

Note: You write the proposal with a faculty mentor, so contact CNS faculty in October or November. This is the highest-effort application on the list and also the one you can most directly shape toward theory.

13. Stanford Sapp Family CS Bio-X Undergraduate Summer Research Program
Host: Stanford University, Stanford CA
Focus: Computational/interdisciplinary bioscience; neuroscience labs participate
Info: <https://biox.stanford.edu/usrp2026>
Note: Check current-year eligibility - some cycles are Stanford-only.

=====

SECTION 3 - COMPUTATIONAL PSYCHIATRY AND COMPUTATIONAL COGNITIVE SCIENCE

=====

14. SPICE - Summer Program in Computational Psychiatry Education
Host: Center for Computational Psychiatry, Icahn School of Medicine at Mount Sinai, New York NY (55 W 125th St)
Focus: Two weeks of lectures in neuroscience, psychiatry, and computational science, then six weeks on an independent mentored project. The only undergraduate-accessible computational psychiatry program of its kind in the U.S.
Length: 8 weeks, in person, Mon-Fri
Eligibility: 16+ and at least a high school sophomore, so undergraduates are eligible. Local students preferred for the in-person format.
Info: <https://www.neurocpu.org/spice>
Note: Watch this page from late winter. Also look at the Center's GitHub (github.com/Center-for-Computational-Psychiatry) to see the toolkit they actually teach.
15. Icahn School of Medicine at Mount Sinai - Summer Undergraduate Research Program (SURP)
Host: Mount Sinai, New York NY
Focus: Biomedical research including the Friedman Brain Institute and the computational psychiatry group
Apply: <https://icahn.mssm.edu/education/non-degree/surp4us>
Note: General biomedical SURP; you can request a computational mentor.
16. Undergraduate Summer Research Training in Neuroscience
Host: NYU Grossman School of Medicine, Department of Neuroscience, New York NY
Deadline: 16 January [2026 CYCLE]
Apply:
<https://med.nyu.edu/departments-institutes/neuroscience/education/undergraduate-summer-research-training>
17. Center for Neural Science REU / Summer Undergraduate Research Program
Host: New York University, New York NY
Focus: NYU CNS is one of the strongest theoretical/computational

neuroscience departments anywhere. Ask specifically for a theory or computational lab.

Info: <https://as.nyu.edu/departments/cns/UndergraduateProgram.html>

Listing:

<https://www.pathwaystoscience.org/programhub.aspx?sort=SUM-NYU-NeuralScience>

Note: [STATUS UNCERTAIN] - the REU award has lapsed in some years. Confirm before relying on it.

SECTION 4 - RESEARCH INSTITUTES (NON-UNIVERSITY)

18. Salk SURF - Summer Undergraduate Research Fellowship

Host: Salk Institute for Biological Studies, La Jolla CA

Focus: Includes the Computational Neurobiology Laboratory (Sejnowski and colleagues) - a foundational comp-neuro group

Length: 9 weeks (1 virtual week + 8 in person)

Support: Competitive hourly wage, round-trip domestic travel, local housing as needed

Eligibility: 18+; rising juniors or seniors, or community college transfer students; STEM major; 3.0+ overall GPA, 2.5+ in science; must be authorized to work in the U.S.

Dates: 7 June - 6 August 2027 [2027 CONFIRMED]

Applications open: 1 October 2026 [2027 CONFIRMED]

Review: through January; interviews in February; offers by end of February

Apply:

<https://www.salk.edu/about/our-community/research-and-training-opportunities/summer-research-opportunities/>

Contact: community@salk.edu

Note: Because it is paid as a wage rather than a stipend, work authorization rather than citizenship is the gate.

19. Janelia Undergraduate Scholars Program

Host: HHMI Janelia Research Campus, Ashburn VA

Focus: Neural circuits, imaging, and heavy computational/behavioral analysis. Programming experience in Python, MATLAB, or C++ is a stated requirement.

Eligibility: Enrolled undergraduate or master's students with at least one prior independent (non-coursework) research experience. No stated citizenship restriction.

Info:

<https://www.janelia.org/you-janelia/students-and-postdocs/summer-undergraduate-research-at-janelia>

Contact: snappe@janelia.hhmi.org

Note: [STATUS UNCERTAIN] - the program has skipped years. Email before building an application around it.

20. Allen Institute ASPIRE Internship Program

Host: Allen Institute, Seattle WA

Focus: Brain Science, Neural Dynamics, Brain Health, and other

accelerators. Enormous open datasets and a strong modeling group.

Length: Year-long (starts June/July, ends the following May)

Eligibility: POST-BACCALAUREATE ONLY - bachelor's completed before the start, awarded no earlier than roughly two and a half years prior

Applications: expected to reopen December 2026 for the Summer 2027 cohort [2027 CONFIRMED as timing]

Apply: <https://alleninstitute.org/careers/internships>

Note: Not an undergraduate summer internship, but the natural landing spot for a graduating senior who wants a serious comp-neuro year before a PhD. Plan for it now if you finish in 2027.

21. Chemers Neustein Summer Undergraduate Research Fellowship (SURF)

Host: The Rockefeller University, New York NY

Length: 10 weeks

Support: Stipend and housing

Apply:

<https://www.rockefeller.edu/education-and-training/surf/application-information/>

Note: Several systems and theoretical neuroscience labs on campus.

22. Kavli NDI Undergraduate Summer Internship Program

Host: Kavli Neuroscience Discovery Institute, Johns Hopkins University, Baltimore MD

Focus: Kavli NDI's remit is explicitly data science and neuroscience

Deadline: 7 March 2026 [2026 CYCLE]

Apply: <https://kavlijhu.org/funding/3>

Contact: KavliNDI@jhu.edu

Related: JHU School of Medicine Summer Internship Program -

<https://www.hopkinsmedicine.org/som/pathway/summer-internship-program>

23. NSF REU: Biological Discovery in Woods Hole

Host: Marine Biological Laboratory, Woods Hole MA

Focus: MBL is the historical home of computational and systems neuroscience summer training (Methods in Computational Neuroscience, Neural Systems and Behavior)

Info:

<https://www.mbl.edu/education/internships/nsf-reu-biological-discovery-woods-hole>

Note: Applications for a given summer typically close in February.

=====

SECTION 5 - UNIVERSITY NEUROSCIENCE SUMMER PROGRAMS

General neuroscience programs where you can request a computational mentor. Deadlines below are from the 2026 cycle and are reliable to within a week or two year over year.

=====

24. Summer Program in Neuroscience (SPIN)

Host: Boston University, Boston MA

Deadline: 28 February [2026 CYCLE]

Apply: <https://sites.bu.edu/spin/>

25. Summer Research Program, Vollum Institute / Neuroscience Graduate Program
Host: Oregon Health & Science University, Portland OR
Deadline: 1 February [2026 CYCLE]
Apply: <https://www.ohsu.edu/school-of-medicine/neuroscience-graduate-program>
26. NeuroSURP - Summer Undergraduate Research Program in Neuroscience
Host: Rutgers Robert Wood Johnson Medical School, Piscataway NJ
Deadline: 16 February [2026 CYCLE]
Apply:
[https://rwjms.rutgers.edu/departments/neuroscience-and-cell-biology/education/summer-undergraduate-research-program-in-neuroscience-\(neurosurg\)](https://rwjms.rutgers.edu/departments/neuroscience-and-cell-biology/education/summer-undergraduate-research-program-in-neuroscience-(neurosurg))
27. Summer Neuroscience Internship Program
Host: University of Florida, Gainesville FL
Deadline: 13 February [2026 CYCLE]
Apply:
<https://neuroscience.ufl.edu/education/summer-neuroscience-internship-program/>
Note: In-state option if you want to stay in Florida.
28. Summer Research Programs, Center for Neuroscience
Host: University of Pittsburgh, Pittsburgh PA
Deadline: 24 January [2026 CYCLE]
Apply: <https://somgrad.pitt.edu/prospective-students/summer-research-programs>
Note: Same city as uPNC and shares the CNBC faculty. A reasonable backup if uPNC does not come through.
29. WUSTL ENDURE - two summers of paid neuroscience research
Host: Washington University in St. Louis, St. Louis MO
Deadline: 2 February [2026 CYCLE]
Apply: <http://endure.wustl.edu/>
Note: Two-summer commitment; strong computational and imaging labs.
30. NURO - Neuroscience Undergraduate Research Opportunity
Host: West Virginia University, Morgantown WV
Deadline: 30 January [2026 CYCLE]
Apply:
<https://medicine.hsc.wvu.edu/neuroscience/about-us/training-and-internships/neuroscience-undergraduate-research-opportunity-nuro/>
31. DENDRITES / DARN Summer Neuroscience Programs
Host: University of Chicago Neuroscience Institute, Chicago IL
Length: 9 weeks (15 June - 14 August 2026) [2026 CYCLE]
Support: \$5,100 stipend, housing, flights
Eligibility: First-, second-, and third-year students from non-UChicago institutions; one academic year remaining after the program;
U.S. citizen or permanent resident
Apply: <https://neuroscience.uchicago.edu/DARN-DENDRITES>
Note: You name three preferred faculty mentors in the application - name computational ones.

32. Neuroscience Research Experience for Undergraduates
Host: Georgia Tech + Georgia State University, Atlanta GA
Focus: Human neuroscience - EEG and fMRI, with real signal-processing and analysis content across Human Motor Control, Cognitive Processing, and Human Neurophysiology
Length: 10 weeks (17 May - 24 July) [2026 CYCLE]
Support: \$7,000 stipend, campus housing
Eligibility: U.S. citizen or permanent resident; entering junior or senior year; preference for students whose home institutions lack MRI/EEG access
Deadline: 19 February, 11:59pm ET [2026 CYCLE]
Apply: <https://reu.neuroscience.gatech.edu/neuroscience-reu-application>
Contact: aisha.webb@cos.gatech.edu
33. Paid Undergraduate Summer Research Program in Neuroscience
Host: Indiana University School of Medicine, Indianapolis IN
Apply:
<https://medicine.iu.edu/research-centers/neurosciences/education/summer-research>
34. NSURP - Neuroscience Summer Undergraduate Research Program
Host: University of Texas Medical Branch, Galveston TX
Listing:
https://www.pathwaystoscience.org/Discipline.aspx?sort=MED-NeuroSci_Neuroscience
35. Summer Research Opportunity for Undergraduates in Neuroscience
Host: University of Alabama at Birmingham, Birmingham AL
36. Psychology and Neuroscience REU
Host: Brooklyn College, CUNY, Brooklyn NY
37. SMARTMIND - Summer Mentoring and Research in Transdisciplinary Methodologies in the Neuroscience of Drug Abuse
Host: University of Texas at El Paso, El Paso TX
38. STARTneuro
Host: UC San Diego, La Jolla CA
Focus: Neuroscience research training; UCSD and the adjacent Salk campus form one of the densest comp-neuro clusters in the country
Apply: <https://startneuro.ucsd.edu/>
39. Neuroscience Summer Student Program
Host: University of Washington, Seattle WA
Info: <https://www.washington.edu/undergradresearch/summer/programs/>
Note: UW's Computational Neuroscience Center is the intellectual home of the Neural Computation and Engineering minor; its own undergraduate training program is [STATUS UNCERTAIN] but the department-level summer programs continue. Contact: cncadmin@uw.edu
40. Summer Undergraduate Research Program

Host: Baylor College of Medicine (SMART Program), Houston TX

Focus: Includes computational and systems neuroscience labs

Apply:

<https://www.bcm.edu/education/graduate-school-of-biomedical-sciences/degree-programs-and-certificates/smart-program>

=====

SECTION 6 - NEURAL ENGINEERING AND NEUROTECHNOLOGY REUs

Adjacent to comp neuro; heavy on signal processing, decoding, and modeling.

=====

41. SURE - Summer Undergraduate Research in Engineering

Host: Georgia Tech, Atlanta GA

Focus: Explicitly includes the intersection of engineering and neuroscience

Deadline: 15 February [2026 CYCLE]

Apply: <https://sure.gatech.edu>

42. Research Experience for Undergraduates

Host: Center for Neurotechnology, University of Washington, Seattle WA

Support: \$6,000 stipend, free on-campus housing, up to \$700 travel

Eligibility: U.S. citizen or permanent resident, 18+, 40 hrs/week

Info:

<https://centerforneurotech.uw.edu/education/undergraduate/research-experience-for-undergraduates/>

Contact: perl@uw.edu

Note: [STATUS UNCERTAIN] - not held in Summer 2026. Check whether it returns for 2027.

43. CARTA BRAIN REU

Host: North Carolina State University, Raleigh NC

Focus: Real-time analytics applied to neurotechnology - neural interfaces, diagnostics, robotics, neural and cognitive engineering

Length: 10 weeks

Eligibility: Rising sophomores, juniors, seniors

Apply: <https://carta.ncsu.edu/carta-brain-reu/>

44. SUNFEST - Summer Undergraduate Fellowship in Sensor Technologies

Host: University of Pennsylvania School of Engineering, Philadelphia PA

Focus: Sensors and devices; Penn's Center for Neuroengineering and Therapeutics participates, and Penn also houses the Computational Neuroscience Initiative

Apply: <https://sunfest.seas.upenn.edu/apply-online/>

Related: <https://cnt.upenn.edu/education-outreach/student-opportunities/>

45. Neural Systems Engineering REU

Host: University of Minnesota, Minneapolis MN

Status: [STATUS UNCERTAIN] - the standalone REU has ended. Neural engineering labs still take summer students through LSSURP:

<https://www.med.umn.edu/education-training/graduate-programs/life-sciences-summer-un>

dergraduate-research-program-lssurp/application

46. ECE REU Site

Host: University of Utah, Salt Lake City UT

Focus: Neural interfaces and biomedical signal processing among the project areas

Apply: <https://www.ece.utah.edu/reu-site-program/>

47. Cornell Neurotech

Host: Cornell University, Ithaca NY

Info: <https://neurotech.cornell.edu/>

Note: Mong Fellowships are for postdocs/faculty, but the center hosts undergraduate summer researchers through Cornell's own programs. Best route is emailing a lab directly in the autumn.

=====

SECTION 7 - LARGE UMBRELLA AND MULTI-SITE PROGRAMS

One application, many institutions. High leverage - do these early.

=====

48. Leadership Alliance SR-EIP

Scope: 20+ research institutions including Brown, Caltech, Columbia, Cornell, Emory, Harvard, Johns Hopkins, MIT, NYU, Princeton, Stanford, and Yale

Length: 8-10 weeks

Support: Stipend, travel, and housing from the host institution

Eligibility: U.S. citizen or permanent resident; full-time at an accredited U.S. college; 3.0+ GPA; committed to PhD or MD-PhD; at least two semesters completed and one remaining. F-1 visa holders are not eligible.

Applications open: 1 November | Deadline: 3 February [2026 CYCLE]

Apply:

<https://theleadershipalliance.org/summer-research-early-identification-program>

Note: This one application reaches both Brown's Carney Computational Neuroscience program (entry 2) and Princeton's SYNAPSE program (entry 6). Highest return on effort of anything on this list.

49. Amgen Scholars - U.S. Program

Scope: 14 hosts - Caltech, Columbia, Duke, Harvard, Howard, Johns Hopkins, Stanford, UC Berkeley, UCLA, UCSF, UNC Chapel Hill, UT Southwestern, WashU, Yale

Length: 8-10 weeks, June-August

Support: Stipend, housing, meals, and travel to the national symposium

Eligibility: U.S. citizen or permanent resident; sophomore, junior, or non-graduating senior; cumulative GPA 3.2+; PhD or MD-PhD intent

Deadline: 1 February (universal across sites) [2026 CYCLE]

Apply: <https://amgenscholars.com/us-program/>

Note: Separate application per institution, but shared deadline and shared materials. Apply to three or four.

50. NSF ETAP - Education and Training Application portal
Scope: A growing share of NSF REU sites accept applications only through ETAP, and you can filter by field
Apply: <https://etap.nsf.gov>
Note: Make an account in October and set up saved searches for "neuroscience," "computational," and "neural."

=====

SECTION 8 - GOVERNMENT AND NATIONAL LABORATORY ROUTES

=====

51. NIH Summer Internship Program (SIP)
Host: NIH Intramural Research Program - Bethesda MD and other campuses.
For comp neuro, target NIMH (Section on Computational and Cognitive Neuroscience, Learning and Decision Making), NINDS, NEI, and NIDA.
Length: 8+ weeks over the summer
Support: Stipend scaled to education level; free parking, transit help
Eligibility: U.S. citizen or permanent resident; 18+ by 30 September 2027; enrolled at least half time
Applications open: mid-November 2026 | Close: mid-February 2027
[2027 CONFIRMED]
Selections: complete by 1 April 2027
Apply: <https://www.training.nih.gov/research-training/pb/sip/>
Note: PIs hire directly. The application is a database entry - the thing that actually works is emailing individual PIs in December and January with a short, specific note and your CV.
52. DOE SULI - Science Undergraduate Laboratory Internships
Scope: 17 national laboratories. For brain-adjacent computing, Oak Ridge (neuromorphic computing group) and Sandia are the relevant ones.
Support: Stipend, housing or housing allowance, travel
Eligibility: U.S. citizen or permanent resident, 17+, enrolled full time
Deadlines: roughly early October for the following summer, and January for the summer term - check the current cycle
Apply: <https://science.osti.gov/wdts/suli>
ORNL: <https://zintellect.com/Opportunity/Details/DOE-ORNL-SULI>
Note: Neuromorphic computing is not computational neuroscience, but it is a strong quantitative credential and pays well.

=====

SECTION 9 - REMOTE, ONLINE, AND UNCONVENTIONAL OPTIONS

=====

Worth doing alongside or instead of a residential program - especially if you strike out on the competitive ones.

=====

53. Neuromatch Academy - Computational Neuroscience
Format: Fully online, synchronous, three weeks each July, ~8 hrs/day in pods of ~15 students with a dedicated TA
Content: Machine learning (GLMs, dimensionality reduction, deep learning),

dynamical systems, stochastic processes and reinforcement learning, causality. Taught in Python via Colab/Kaggle.
Prerequisites: Python, linear algebra, probability, calculus, and some neuroscience

Applications: open in February, close ~22 March [2026 CYCLE]

Apply: <https://portal.neuromatchacademy.org/>

Info: <https://neuromatch.io/computational-neuroscience/>

Other courses: NeuroAI, Deep Learning, Computational Behaviour, Computational Tools for Climate Science

Note: Not an internship and not paid, but it is the single fastest way to become credible as a comp-neuro applicant, and financial aid exists. Serving as a TA in a later year is itself a credential.

54. Google Summer of Code with INCF

Format: Remote, paid, roughly 12 weeks, working on open-source neuroscience software with a mentor

Info: <https://www.incf.org/activities/gsoc>

Also: <https://neuroinformatics.dev/get-involved/gsoc/index.html>

Timing: Organizations announced in February; student proposals due in late March/early April

Note: Excellent if your strength is code. Produces a public, citable contribution - unusually good evidence for PhD applications.

55. Direct outreach to individual labs

Note: A large share of undergraduate comp-neuro summer positions are never advertised. Many PIs have discretionary funds and will take a strong student who emails in October or November with a specific, concrete interest in their actual papers. This costs nothing but time, and it is how a meaningful fraction of these positions are actually filled. Send 20-30 short, individually written emails. Attach a CV. Name a paper and say what you would want to extend.

SECTION 10 - ELIGIBILITY TRAPS TO WATCH

- "One academic year remaining." A very large number of these programs (uPNC, Carney, Leadership Alliance, Amgen, MSRP, DENDRITES, Missouri) require that you still be enrolled after the summer. If you graduate in spring 2027, you are ineligible for most of Section 1 and Section 7 in Summer 2027. The options that stay open are: Kempner (entry 9, accepts recent graduates), Allen Institute ASPIRE (entry 20, post-bac only), Flatiron CCN (entry 4, which takes pre-doctoral applicants), NIH postbac IRTA, and direct lab outreach.
- Citizenship. NSF- and NIH-funded programs require U.S. citizenship or permanent residency, with no exceptions and no waivers. Institute-funded programs (CSHL, Salk, Flatiron, Janelia, Kempner) are the realistic route for international students.
- Sophomore/junior windows. Several programs exclude first-years and graduating seniors on both ends.

- Prior research required. MSRP, Janelia, and Kempner all effectively require it. If you do not have it yet, the local-lab route in your own department is the prerequisite, not a consolation prize.

SECTION 11 - WHERE TO FIND MORE

- Faculty for Undergraduate Neuroscience internship list (updated each year, organized by deadline): https://www.funfaculty.org/undergrad_internships
- Pathways to Science neuroscience directory: https://www.pathwaystoscience.org/Discipline.aspx?sort=MED-NeuroSci_Neuroscience
- NSF ETAP: <https://etap.nsf.gov>
- NSF REU site search: https://www.nsf.gov/crssprgm/reu/reu_search.jsp
- AAMC summer undergraduate research listing:

<https://students-residents.aamc.org/phd-biomedical-science/summer-undergraduate-research-programs>

- The comp-neuro mailing list, where institutes post internships directly: <https://lists.cnsorg.org/hyperkitty/list/comp-neuro@lists.cnsorg.org/>
- The systems-neuroscience Google group (Flatiron, CSHL, and others post openings here): groups.google.com/g/systems-neuroscience

SECTION 12 - TIMELINE FOR THE SUMMER 2027 CYCLE

SEPTEMBER-OCTOBER 2026

Identify 3-4 faculty who could write letters; ask them now, not in January.
 Draft one strong general personal statement you will adapt.
 Salk SURF opens 1 October.
 DOE SULI summer-term deadline falls in this window for some labs.
 Begin direct emails to PIs.

NOVEMBER 2026

Leadership Alliance opens 1 November - do this one first.
 Princeton SYNAPSE opens 1 November.
 NIH SIP opens mid-November.
 Allen Institute ASPIRE expected to open in December.

DECEMBER 2026

Flatiron CCN internships open 1 December.
 Order transcripts. Confirm letter writers have submitted or are on track.

JANUARY 2027

15 Jan - CSHL URP [confirmed]
 16 Jan - NYU Grossman neuroscience
 24 Jan - Pitt Center for Neuroscience
 30 Jan - MIT MSRP-Bio / BCS
 30 Jan - WVU NURO

FEBRUARY 2027

- 1 Feb - Amgen Scholars (all 14 sites)
- 1 Feb - Princeton SYNAPSE closes
- 1 Feb - OHSU Vollum
- 2 Feb - WUSTL ENDURE
- 3 Feb - Leadership Alliance SR-EIP (and therefore Brown Carney)
- 13 Feb - University of Florida
- 15 Feb - uPNC (CMU/Pitt)
- 15 Feb - Georgia Tech SURE
- 16 Feb - Rutgers NeuroSURP
- mid-Feb - NIH SIP closes
- 19 Feb - Georgia Tech/GSU Neuroscience REU
- 28 Feb - BU SPIN

MARCH 2027

- 7 Mar - Kavli NDI at Johns Hopkins
- mid-Mar - University of Missouri Neuro-REU
- ~22 Mar - Neuromatch Academy
- ~30 Mar - Kempner Institute first cohort
- late Mar - Google Summer of Code proposals

APRIL 2027 ONWARD

Late-posting REUs and unfilled slots. Keep checking ETAP and the comp-neuro list - programs do reopen when accepted students decline.

SECTION 13 - PRACTICAL NOTES ON APPLYING

1. Apply to 10-15 programs, not 3. Acceptance rates at the named comp-neuro programs are in the single digits to low teens.
2. Name specific labs and specific papers. Generic "I am passionate about the brain" statements are indistinguishable from each other. "I want to work with X on Y because of the result in their 2025 paper" is not.
3. Show the quantitative work, concretely. List the languages, the courses (linear algebra, probability, differential equations, statistics, ML), and any analysis you have actually done. A short GitHub with two clean, readable projects does more than another paragraph of prose.
4. Letters are the bottleneck. Ask in October. Give writers your CV, your statement, the list of programs, and the deadlines in one email.
5. Reuse ruthlessly. One base statement, then two or three paragraphs rewritten per program.
6. Track everything in a spreadsheet: program, deadline, portal, materials, letters requested, letters submitted, status.
7. Apply to the umbrella programs first (Leadership Alliance, Amgen). One application, many shots.
8. If you get nothing, that is common and not disqualifying. A summer in a lab at your own institution, plus Neuromatch, plus a real analysis project, is a competitive profile for the following year and for PhD applications.

=====

END OF LIST

Verify every deadline against the program's own page before applying; dates marked [2026 CYCLE] are last year's and will shift by a few days.
